# Contents

**0 Introduction to *FeynCalc*** . . . . . **5**
■ Acknowledgments . . 5 ■ Installation . . 6

**1 Input Functions** . . . . . **7**
■ Entering Tensors and Scalar Products . . 7 ■ Entering Dirac Matrices . . 9 ■ Entering Gell-Mann Matrices and SU(3) Structure Constants . 10 ■ Entering Spinors . 10 ■ Entering Denominators of Propagators . 11 ■ Entering Small Variables . 12

**2 Elementary Calculations** . . . . . **13**
■ Contraction of Metric Tensors, Four-Vectors and Levi-Civita Tensors . 13 ■ Simplification of Scalar Products and Four-Vectors . 14 ■ Simplification of Products of Dirac Matrices and Spinors . 14 ■ Dirac Traces . 16 ■ Gell-Mann Traces and Contraction of Color Indices . 20

**3 One-Loop Calculations** . . . . . **21**
■ Passarino-Veltman Integrals and Reduction of Coefficient Functions . 21 ■ A One-Loop Self Energy Diagram . 26 ■ Generic Diagrams for $W \to f_i f_j'$ with OneLoop . 26 ■ The Options of OneLoop . 30 ■ OneLoopSum and its Options . 31 ■ The Box Graphs of $e^+e^- \to ZH$ . 33

**4 Miscellaneous Functions** . . . . . **37**
■ Functions for Polynomial Manipulations . 37 ■ An Isolating Function for Automatically Introducing Abbreviations . 38 ■ An Extension of FreeQ and Two Other Useful Functions . 39 ■ Writing Out to Mathematica, Fortran, Macsyma and Maple . 39 ■ More on Levi-Civita Tensors . 41 ■ Polarization Sums . 42 ■ Simplifications of Expressions with Mandelstam Variables . 42 ■ Permuting the Arguments of the Four-Point Function . 43 ■ On the Internal Representation . 43 ■ FeynCalcForm . 45 ■ Three New Global Variables . 45 ■ References . 46

**5 Reference Guide for FeynCalc** . . . . . **47**
